Middlewares

Step1:Run command : php artisan make:middlewares middlewares_name

Step2: go to Boostrap\App.php:

```php
<?php

use App\Http\Middleware\HandleAppearance;
use App\Http\Middleware\HandleInertiaRequests;
use Illuminate\Foundation\Application;
use Illuminate\Foundation\Configuration\Exceptions;
use Illuminate\Foundation\Configuration\Middleware;
use Illuminate\Http\Middleware\AddLinkHeadersForPreloadedAssets;
use App\Http\Middleware\AdminMiddleware; //add
return Application::configure(basePath: dirname(__DIR__))
    ->withRouting(
        web: __DIR__.'/../routes/web.php',
        commands: __DIR__.'/../routes/console.php',
        health: '/up',
    )
    ->withMiddleware(function (Middleware $middleware) {
        $middleware->append(AdminMiddleware::class);//add
        $middleware->web(append: [

            \App\Http\Middleware\HandleInertiaRequests::class,
            \Illuminate\Http\Middleware\AddLinkHeadersForPreloadedAssets::class,

        ]);

        $middleware->encryptCookies(except: ['appearance', 'sidebar_state']);

        $middleware->web(append: [
            HandleAppearance::class,
            HandleInertiaRequests::class,
            AddLinkHeadersForPreloadedAssets::class,
        ]);
    })
    ->withExceptions(function (Exceptions $exceptions) {
        //
    })->create();
```

Midlewarer.php:

```php
<?php

namespace App\Http\Middleware;

use Closure;
use Illuminate\Http\Request;
use Symfony\Component\HttpFoundation\Response;

class AdminMiddleware
{
    /**
     * Handle an incoming request.
     *
     * @param  \Closure(\Illuminate\Http\Request):
(\Symfony\Component\HttpFoundation\Response)  $next
     */
    public function handle(Request $request, Closure $next): Response
    {

        if($request->role == 111){
                //Admin Password :12345
        echo "Hello Admin";

        }

        else {

            die('you cannot access admin page');
        }

        return $next($request);
    }
}
```
